

Climate Change

Activating Questions:

1. Spend 5 minutes writing what you know about the term “Climate Change”. You can write what you already know, what you think you know, what you’ve heard, what you’re confused or unsure about, or what you want to know.
2. After all students are done writing, turn and read your writings to your table group. After you have heard each other’s writings, work together to write a **collaborative summary** in which you combine your ideas for Paragraph #2. Note: Everyone must write a combined paragraph. We will take turns sharing this with the rest of the class.

Post Viewing/Learning Responses:

3. What did you learn about the realities of climate change? Can you answer any of the ‘tough’ climate change questions that are on the website? Attempt to answer a couple of them.
4. What is currently being done to resolve the effects of climate change? What are the most pressing concerns? What can YOU do? What WILL you do?
